SUMMARY

Backend engineer with **5+ years of experience** across **.NET Core/C#** and **Python/FastAPI**, building enterprise systems with measurable performance gains in **T-SQL optimisation** and reporting. Recently extended into **AI/LLM engineering** (RAG, embeddings, voice-AI), with **Angular** experience for full-stack delivery.

WORK EXPERIENCE

Senior Software Developer, Marcus Evans

Oct 2023 - Present

Andheri, Mumbai (Hybrid)

- Own backend development of two internal enterprise products (ME:EM and CMS) built on .NET Core, Angular, and SQL Server.
- Led and mentored a **team of 5 developers** through sprint planning and code reviews, rolling out a **12-week onboarding roadmap**.
- Resolved recurring production incidents through root-cause analysis of legacy APIs, SQL procedures, and integration points.
- Replaced a **week-long** manual Excel reporting cycle with SSRS/RDLC reports delivered within a **single day**.
- Tuned T-SQL stored procedures, cutting a long-running report query from **7-8 minutes to under 1 minute** and eliminating recurring deadlocks.
- Automated HubSpot CRM sync using Python and Azure Service Bus, cutting a **multi-day manual export/import process to under 5 minutes**.
- Built a RAG-based call intelligence pipeline processing **500+ daily sales calls (2+ minutes)** across **global teams**, auto-extracting client-profiling data and flagging missed vs. asked discovery questions to improve sales pitch consistency.
- Worked directly with business stakeholders to gather reporting requirements and translate them into maintainable backend solutions.
- **Client Analytics Portal**: built a unified analytics portal consolidating two internal systems, with ABAC access control, Redis caching, and WebSocket real-time sync; used daily by **100+ sales team members and 10+ C-suite executives, including the company owner**.
- **Also delivered**: a Voice AI agent (Twilio/LiveKit real-time transcript capture with zero/few-shot LLM prompting), built the New Hire Tracker Portal (FastAPI, MongoDB, RBAC, Azure AD integration) and a TAP budgeting tool syncing client financial data from SharePoint, and architected the complete .NET backend for an internal conference mobile app, including schema design (push notifications, cloud storage).

Associate Software Engineer, TSS Consultancy - TrackWizz

Aug 2021 - Oct 2023

Lower Parel, Mumbai (Hybrid)

- Led development of the Employee Trade Tracking (ETT) product using Angular and .NET Core for iOS and Android clients.
- Built and maintained ASP.NET Web Services for employee data integration, handling synchronisation and payload transformation.
- Implemented Google SSO authentication across the ETT platform, improving login security.
- Optimised SQL queries and stored procedures in MS SQL Server, resolving performance bottlenecks via query plan analysis.

SKILLS

Languages: C#, Python, SQL, TypeScript, JavaScript

Backend: .NET Core, ASP.NET Web API, FastAPI, REST APIs, OOP

AI & LLM: RAG, Prompt Engineering, OpenAI API, Embeddings, Azure Speech Services

Frontend: Angular, AngularJS, Component Architecture

Databases: MS SQL Server, T-SQL, Stored Procedures, MongoDB, Redis (caching)

Reporting & BI: SSRS, RDLC Reports, Superset Dashboards

Cloud & Auth: Azure Service Bus, Firebase, Docker, JWT, Google SSO, Azure Key Vault

EDUCATION

Bachelor of Science in Information Technology, University of Mumbai - SST College - 2018 - 2021
