

JAYESH RAJPUT

Full-Stack .NET Developer

Mumbai, Maharashtra | +91-9834056247 | jayeshrajput0701@gmail.com

LinkedIn: <https://in.linkedin.com/in/jayesh-rajput-1061a5204>

PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 4.5+ years of experience building enterprise-grade web applications, REST APIs, reporting solutions, and database-driven systems. Proficient in C#, .NET Core, ASP.NET Web API, Angular, SQL Server, SSRS, SSIS, and RDLC Reports. Strong background in application architecture, stored procedure optimization, production issue resolution, and stakeholder-driven reporting solutions. Additional expertise in Python and FastAPI for backend automation and internal tools.

TECHNICAL SKILLS

Programming Languages: C#, Python, SQL, JavaScript, TypeScript

Backend: .NET Core, ASP.NET Web API, REST APIs, Microservices, OOP, Design Patterns

AI & LLM: RAG, Prompt Engineering, OpenAI API, Embeddings, Transcription (Speech-to-Text).

Frontend: Angular, AngularJS

Databases & Reporting: MS SQL Server, T-SQL, Stored Procedures, SSRS, SSIS, RDLC Reports, MongoDB

Cloud & Messaging: Azure Service Bus, Azure Key Vault, RabbitMQ, Firebase

DevOps & Tools: Docker, Git, Azure DevOps, Jira, SonarQube

Practices: Agile, Scrum, Kanban, Code Reviews, Production Support, CI/CD

PROFESSIONAL EXPERIENCE

Senior Software Developer

Marcus Evans, Mumbai, India | October 2023 - Present

- **Led and managed** a team of **5 developers**, planning and tracking technical deliverables while mentoring team members through structured learning plans, code reviews, and technical guidance, improving overall team productivity and technical capability by **35%**
- Enhanced and maintained internal enterprise products (**ME:EM** and **CMS**) using .NET Core, Angular, SQL Server, and RDLC Reports, improving application usability by **25%** and reducing operational issues by **30%**
- Designed and deployed **SSRS** and **RDLC**-based reports for internal business tools, improving reporting accuracy by **35%** and reducing manual reporting efforts by **40%**
- Developed and optimized **T-SQL stored procedures**, functions, queries, and database objects, improving database query performance and reducing execution time for critical operations
- Architected and developed the complete backend for an internal mobile application using **.NET Core Web API**, improving **API response efficiency** and ensuring **scalable RESTful services**
- Resolved production-level bugs across multiple web applications through root cause analysis and structured fixes, improving application stability by **40%** and reducing recurring production issues
- Supported and optimized legacy enterprise applications built with C#, .NET Core, Angular, and SQL Server, improving maintainability and reducing system downtime.
- **Integrated HubSpot CRM** with existing applications using **Python and Azure Service Bus**, automating workflows and reducing manual data synchronization efforts.
- Built an internal **New Hire Tracker Tool** using FastAPI, MongoDB, and Docker, reducing manual onboarding tracking efforts and streamlining HR processes
- Collaborated with business users and stakeholders to improve reporting workflows and deliver maintainable solutions, reducing requirement turnaround time by **25%**.

GENAI SYSTEMS & PROJECTS

Enterprise Client Intelligence & RAG Platform

- Contributed to building a cloud-native AI pipeline using Azure Speech Services, GPT-4, and ADLS Gen2 to transcribe and analyze client conversations for business metadata extraction
- Assisted in developing a RAG-powered client intelligence platform combining unstructured call transcripts with CRM data to enable natural language querying and actionable business insights

Voice AI Agent

- Contributed to developing a Voice AI Agent using Twilio and LiveKit for real-time audio streaming, automated transcript capture, and CRM-driven follow-up workflows
- Supported implementation of AI-driven communication workflows to improve customer engagement automation and operational efficiency

Associate Software Engineer

TSS Consultancy - TrackWizz, Mumbai, India | August 2021 - October 2023

- Led development and enhancement of the **Employee Trade Tracking (ETT) product** using Angular and .NET Core, improving usability and mobile compatibility across iOS and Android
- Developed and maintained ASP.NET Web Services for seamless employee data integration and synchronization across enterprise systems
- Designed and optimized SQL queries, stored procedures, and database objects in MS SQL Server, improving query performance and system reliability
- Implemented Google Single Sign-On (SSO) authentication, improving security and user login experience across the ETT platform
- Identified and resolved SonarQube-reported issues, improving code quality, maintainability, and overall project stability
- Participated in code reviews, sprint planning, and iterative feature delivery using Scrum and Kanban methodologies
- Worked closely with QA, business analysts, and product teams to deliver stable and business-aligned application features

EDUCATION

Bachelor of Science in Information Technology (BSc IT)

SST College, University of Mumbai | August 2018 - March 2021

CGPI: 9.20 / 10.00
